Professional Summary

Full Stack Software Engineer with proven expertise in Java, Spring Boot, React.js, and REST APIs. Demonstrated ability to design, develop, and deploy scalable web applications using modern tech stacks. Seeking Java Full Stack Developer or Backend Engineer roles at top-tier technology companies.

Technical Skills

Programming Languages: Java, JavaScript, Python, PHP, SQL

Frontend Technologies: HTML5, CSS3, Bootstrap, React.js, JSP

Backend Technologies: Spring Boot, Servlets, JDBC, Node.js, Express.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Core CS Concepts: Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Security & Authentication: JWT Authentication, BCrypt Password Hashing, Session Management

Developer Tools: Git, GitHub, Maven, npm, Postman, Apache Tomcat, VS Code, Eclipse

Professional Experience

Freelance Web Developer | Plutography

2026 – Present

- Developed and deployed official website for Plutography photography brand using modern web technologies
- Built responsive user interfaces leveraging HTML5, CSS3, and JavaScript with focus on user experience
- Managed website deployment, maintenance, performance optimization, and production updates
- Collaborated with client to gather requirements and implement requested features
- Website: plutography.in

Python Full Stack Intern | Edutainer

Feb 2026 – May 2026

- Developed full-stack web applications and RESTful APIs with comprehensive API documentation
- Performed database integration, unit testing, debugging, and production deployment
- Implemented backend services and frontend components using Python and modern frameworks

Java Full Stack Trainee | Tap Academy

Feb 2026 – Present

- Built dynamic web applications using Java, SQL, HTML5, CSS3, and JavaScript
- Mastered Object-Oriented Programming, Data Structures, Algorithms, DBMS, JDBC, and Servlets
- Developed modular, maintainable code following software engineering best practices and design patterns

Projects

Invoice Portal | React.js, PHP, MySQL

Full Stack

- Built comprehensive invoice management system with customer management and invoice generation workflows
- Implemented secure authentication, full CRUD operations, payment tracking, and reporting features
- Designed responsive user interface and deployed on InfinityFree cloud platform

FoodieHub – Online Food Ordering Platform | Java, JSP, Servlets, JDBC, MySQL

Full Stack

- Engineered multi-role food ordering platform with JWT-based authentication and role-based access control
- Implemented restaurant management, dynamic menu handling, shopping cart, and transactional order processing
- Developed backend using Java Servlets, JSP, and JDBC; built admin and customer dashboards with features including coupons, product reviews, and real-time notifications
- Architected modular MVC design pattern for scalability and maintainability

Education

Government Engineering College, Raichur

2023 – 2026

Bachelor of Engineering in Computer Science and Engineering | CGPA: 7.6/10

Government Polytechnic College, Raichur

2021 – 2023

Diploma in Electrical and Electronics Engineering | CGPA: 8.28/10

Certifications

AI Tools & ChatGPT Workshop | be10X

June 2026

Completed hands-on training in AI-assisted software development, prompt engineering, debugging methodologies, and productivity automation. Certificate: drive.google.com/file/d/1SvmOS18Ip9Irgwb1xQPp2ueoA6msNhnJ
